

Project title: Saline agriculture for the Kafrelsheikh governorate

Project details

Country: Egypt

Key activity: Training

Starting date: January 2019

Ending date: August 2019

Partners: Nectaerra, Salt Farm Texel

Financed by: TMT

Description of the project

Training

Type of activities carried out

Theory and practical training was given to 24 students of the Kafrelsheikh University on Saline Agriculture. Consortium partners Nectaerra and Salt Farm Texel provided their knowledge and experience on water management and saline farming, respectively. Delphy provided the trainings on harvest and post-harvest management of the crops grown on the demonstration plots (potato, carrot, red beet and kauliflower).
