

Training Cannabis Cultivation Autumn 2021

Delphy is organizing a high-level training in Cannabis Cultivation. The program will be focused on the cultivation of Cannabis in high-tech buildings like greenhouses or indoor facilities. Topics are all growing themes and cultivation techniques. The combination of theory and the practical application by Delphy experts makes this training unique.

Provisional training program

Topics covered are:

- Plant physiology and cultivation
- Irrigation and fertilization
- Crop & climate
(humidity, light, screening)
- Diseases and pests (IPM)
- Overview research cannabis

The schedule will be:

- Every Thursday an online lesson of 1,5 hours by Delphy experts.
- Every Tuesday opportunity for Q&A to the Delphy expert.

Investment

The investment for this training is € 1.795,-
