

Cannabis cultivation training Portugal

9 - 10 November 2023

GOALS

REFRESH

Refresh your basic knowledge of plant cultivation from researchers and plant experts (nutrients, light, climate, water, substrate).

LEARN

Learn about modern solutions for controlling and optimizing your cannabis cultivation from leading horticultural companies

NETWORK

Network with Delphy and Fluence specialists and visit a cultivation site.

INTERACT

Interact with other cannabis growers in your class, and with international LPs.

CONTROL

Control your cannabis cultivation with knowledge, equipment, and network support.

This training is specifically designed for Cannabis growers who work in the cultivation department of a licensed producer of Cannabis (LP) or horticultural companies who are switching to Cannabis cultivation.

TOPICS COVERED DURING THE TRAINING:

- Plant physiology, water, substrate & nutrients
- Interaction between flowering and LED (Fluence)
- Integrated Pest Management & climate control
- Cultivation planning and operations
